FTIR-OEM

IR source, interferometer & detector modules
for modular and OEM applications

The ARCoptix FTIR OEM modules have been developed for system integrators and people looking for a custom FTIR measurement system. The modular solution consist of essentially 3 elements:

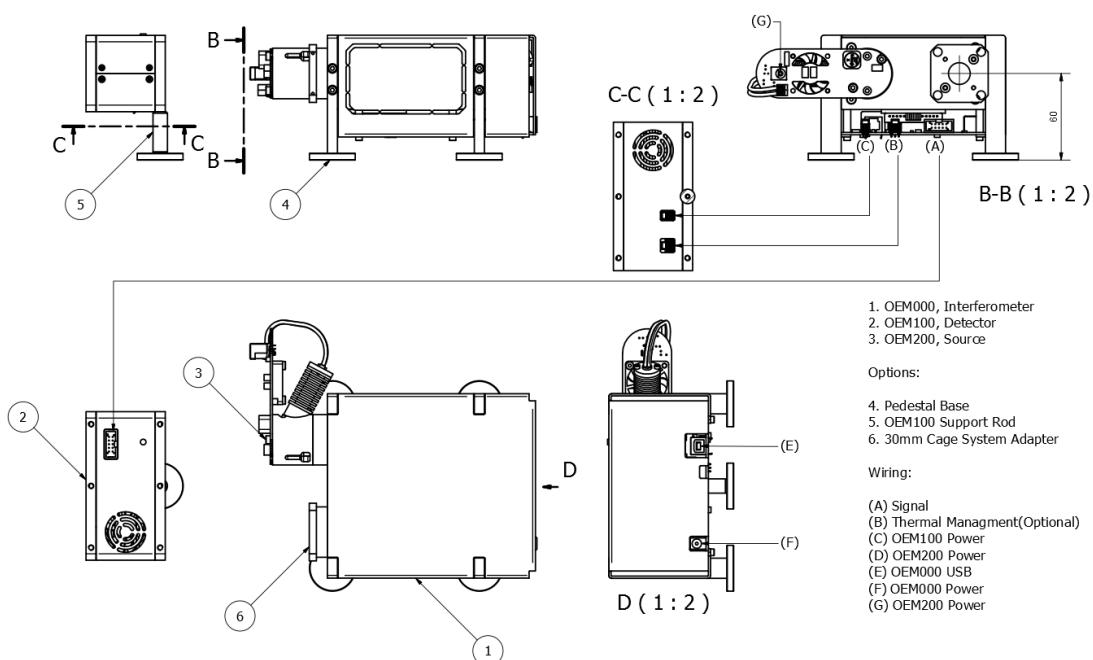

- Interferometer module (FTIR-OEM000)
- Detector module (FTIR-OEM100)
- Light source module (FTIR-OEM200)

▪ OEM system layout

The FTIR-OEM modules are meant for integration in advanced measurement configurations, where a sampling system (such as a short pass or a White multi-pass gas cell for example) is included in the optical path of FTIR system between the interferometer and the detector. A simple example where the sampling accessory would simply be a short-path gas cell is shown in the scheme below. The modules are easily fixed on a breadboard for prototyping. Appropriate accessories for fixing the modules on a standard 25mm pitch M6 breadboards are available as an option.

▪ Interferometer module: FTIR-OEM000

The Arcoptix FTIR-OEM000 is a compact and rugged interferometer module based on a permanently aligned, double-retro-reflector interferometer design. The swinging arm of the interferometer rotates on wear-free flexure system, driven contactless by a magnetic actuator. The system uses as an internal reference a state-of-the art solid-state laser, kept at constant temperature to keep the wavelength scale perfectly constant.

■ Detector module: FTIR-OEM100

The FTIR-OEM100 is an infrared detector module designed to operate in conjunction with the FTIR-OEM000 interferometer module. The detector module has internal optics to focus a collimated beam onto the detector active element. The 2-stage cooling of the MCT detector is driven by a PTEC controller and 4 different gain levels can be adjusted on the detector amplifier. Detectors with spectral ranges up to 12 microns are available.

General specifications

Detector type	Photovoltaic MCT (Mercury-Cadmium-Telluride)
Detector active size	1mm x 1mm
Focusing optics	Off-axis parabola, f=18mm
Input aperture diameter (optical)	12.7mm
FOV (half angle)	28 mrad
Cooling	built-in TEC controller, 2 or 4 stages
Amplifier	Transimpedance amplifier, 4 gain levels selectable via I2C bus.
Preamplifier bandwidth	0-60kHz
Power supply	12V / 3-6W
Dimensions	93mm x 75mm x 66mm

■ IR source module FTIR-OEM200

The FTIR-OEM200 is an infrared light source module designed for the FTIR-OEM000 interferometer module. The system includes an IR source element in a housing with collimating mirror, and a line power supply.

Two different versions are available, one with low-power (LP) for applications where power consumption or heat generation are critical, and a High-Power (HP) version for application requiring maximal output power.

WARNING!

These parts get very hot during operation.
